

DevCloud Style Guide

By Jonathan Speak

ABOUT

DevCloud is a cloud-based web application that focuses on helping developers and designers be more productive. It does that through its simple and intuitive platform that stores files of any kind relevant to projects, as well as a platform for creating Wikis and other important documentation in Markdown format.

AUDIENCE

The DevCloud audience includes **developers & designers** who:

- 1) Value their projects enough to create documentation for organization
- 2) Want one place to house project-related files and have the ability to create documentation for them within the platform.

VIBE

- Easy
- Simple
- Clear
- Delightful
- Beautiful
- Relief
- Intuitive
- Professional
